## Only Two Hundred and Sixteen Feet From the Ferrington Gusher

The Publishers' Company drill is going deeper and deeper toward the Oil Pool at the rate of 100 feet every twenty-four hours

The drillers work night and day, and even while you sleep they are drilling away. Grasp the opportunity while it knocks at your door, and secure 1,000 shares of Publishers' Stock today. By remitting at once, sending check or draft, you can secure 1,000 shares for \$140.00; or 500 shares for \$75.00; or 100 shares for \$16.00.

Publishers Company has one thousand and forty acres of oil land, six big oilers and, as above stated, have located another well, which will make them seven. They will drill twenty more wells as fast as the drill can put them down. The company has oil lands unsurpassed by any ten oil companies in the Kansas oil field. Business men are buying the stock because they realize it will go to one dollar per share. Remember that, even while you sleep, the drill is going deeper and in less than ten days another big oiler will be added to the company's wealth. The Spindle Top Barker knoll, where oil men claim the main pool of the Cherryvale field will be secured, is where the company will drill their next well. Their No. 9 well will be drilled down on Big Hill creek bottom, on the Hill farm, just north of the Snyder well, which today is pushing the oil up over seven hundred feet and it oozes into the tank like a spring. The Publishers Company has holdings worth a quarter of a million dollars. Their lands are absolutely surrounded by oilers. Eighty feet of oil sand a hundred feet north of their north line, thirty-eight feet of oil sand in the Stough well twenty rods east of their northeast corner, twenty feet of oil sand in a well one mile southeast of their southeast corner, twelve feet of oil sand a half mile southwest of their southwest corner, twenty-nine feet of oil sand in their Barker wells along the west center of their holdings, thirty-five feet of oil sand in their Big Snyder Well. As the company is nearing the center of their lands, the wells drilled on every side indicate the oil sand deepening towards the Spindle Top Barker knoll and the Big Hill creek bottom land on the Hill farm.

No one knows what a few days will develop when the drillers are working on this kind of territory. Think of it! two hundred and sixteen feet north of where our company is drilling is the famous Farrington Gusher with eighty feet of oil sand, while welve hundred feet southeast is the Publishers Company Barker Well No. 4, now flowing nine barrels of oil per day. The company will sell a one-hundredth interest for sixteen hundred (\$1,600) dollars, but expects to place the balance of their treasury stock in one-thousand-share lots at one hundred and forty (\$140) dollars per thousand. Time is limited on this deal now. The Publishers Company is conceded to be the strongest, most conservative, best managed and the most promising oil company in south-

The stock is just as sure to gradually advance until it reaches the dollar mark as daylight follows darkness. Remember this company has one fourhundred-acre tract of oil lands alone that has cost twenty-five thousand (\$25,000) dollars. The company has treasury stock enough left to complete fourteen more wells and install a pumping plant. This will start them out with from two hundred and fifty to four hundred barrels of oil, daily production. They will then put half into dividends for the stockholders, and the other half will keep two drills running, and in eighteen months' time after completing the twenty wells they will have eighty wells under the pump. This company is up and doing. Its managers have worked faithfully from the start to place the stock to one dollar per share, and they will finish what they started. If you have money to invest do not listen to the soreheads and knockers, but wire the secretary to hold you one thousand shares of this stock when you read this advertisement, or write for further particulars by return mail.

southeast is the Publishers Well No. 4, on the Barker Address
